ABOUT ME

DevOps-focused Software Engineer with hands-on experience in large-scale repository migrations, CI/CD pipeline development, and AWS cloud environments. Skilled in Python-based automation, debugging, and building scalable systems. Built an end-to-end production-like DevOps system covering CI/CD, infrastructure provisioning, zero-downtime deployment, and monitoring. Actively strengthening expertise in Docker, Kubernetes, and cloud-native DevOps practices.

EXPERIENCE

CAPGEMINI — SOFTWARE ENGINEER / ANALYST **NOV 2024 – PRESENT**

CIGNA ACCOUNT : GITLAB TO GITHUB MIGRATION PROJECT MAR 2026 – APR 2026

- Contributed to migration of 100 repositories from GitLab to GitHub Cloud
- Executed and validated migration workflows, including repository setup, and post-migration verification
- Built and enhanced automation scripts, resolving migration-related issues to ensure smooth transition

HARTFORD ACCOUNT : GITHUB MIGRATION PROJECT APR 2025 – FEB 2026

- Contributed to migration of 10,000+ repositories from GitHub Enterprise Server (GHES) to GitHub Enterprise Cloud (GHEC) across multiple waves
- Executed migration of repositories, Jenkins pipelines, and AWS pipelines using Python-based automation scripts
- Built and enhanced automation workflows for input generation, batching, and execution, improving migration scalability
- Implemented parallel processing and batching, improving large-scale migration efficiency
- Provisioned and validated 5 AWS EC2 instances via IaC pipelines, including environment setup and secure SSH (PEM key) configuration
- Automated retry/backout mechanisms, user mapping, and repository permissions, and optimized scripts to reduce API calls using batching, caching, and efficient request handling
- Debugged and resolved migration failures, including large repositories (git filter-repo), API/script issues, and skipped repositories
- Performed log analysis and validation checks to ensure successful and reliable migration
- Resolved real-world issues including SSO access failures, archived repositories, firewall (SSH) restrictions, and repository access issues
- Archived repositories and uploaded artifacts to Amazon S3 for long-term retention
- Contributed to decommissioning GitHub Actions runners on EC2/ECS post migration
- Created and maintained technical documentation, workflows, and troubleshooting guides

SAFE SIMPLE TECH — QUALITY ASSURANCE CONSULTANT & INTERN **OCT 2023 – OCT 2024**

- Worked as a Consultant (Aug 2024 – Oct 2024) and QA Intern (Oct 2023 – Jul 2024)
- Developed and executed automation test scripts using Selenium and Appium for Web, Android, and iOS platforms
- Performed manual testing and collaborated with developers to resolve defects
- Validated REST APIs and backend integrations
- Created technical documentation and test reports

DIGINIQUE TECHLAB (IHUB, IIT ROORKEE) — INTERN (PYTHON, DATA ANALYTICS, ML) **JUL 2023 – SEPT 2023**

- Contributed to project development from concept to implementation
- Presented project outcomes, improving team understanding of objectives and solutions
- Gained hands-on experience in Python, data analysis, and machine learning tools

PROJECTS

Production-Ready CI/CD Pipeline with Zero-Downtime Deployment

- Built an end-to-end CI/CD pipeline using GitHub Actions to automate linting, testing, build, and deployment of a Dockerized Flask application on AWS EC2
- Implemented Blue-Green deployment using NGINX with health checks and automated rollback to ensure zero-downtime releases
- Optimized pipeline performance and reliability using caching, parallel execution, and centralized log/artifact storage in Amazon S3

Infrastructure Automation & Monitoring Setup (IaC + Observability)

- Provisioned AWS infrastructure (EC2, Security Groups, networking) using Terraform for scalable and repeatable environment setup
- Deployed containerized application and integrated Prometheus & Grafana for real-time monitoring and observability
- Built dashboards and implemented alerting mechanisms for system and application metrics, with logs/artifacts stored in Amazon S3

EDUCATION

B.Tech – Information Technology

Maharaja Agrasen Institute of Technology (2024)

CGPA: 9.07

SKILLS

- **Programming & Scripting:** Python (Automation, Debugging), Bash/Shell Scripting
- **Version Control:** Git, GitHub, GitLab (Advanced Workflows, Repository Migration)
- **Cloud & Infrastructure:** AWS (EC2, S3, IAM), Terraform (Infrastructure as Code)
- **DevOps & CI/CD:** GitHub Actions, CI/CD Pipelines, Jenkins (Basics), GitLab CI/CD (Basics)
- **Containerization & Orchestration:** Docker, Kubernetes (Fundamentals)
- **Monitoring & Observability:** Prometheus, Grafana (Dashboards, Alerting)
- **Automation & Optimization:** Workflow Automation, Parallel Processing, Performance Optimization
- **Testing & Data (Basics):** Selenium, Appium, Power BI, Machine Learning, Excel
- **Databases:** MySQL

Leadership & Activities:

- Core Member, Funk In Motion (Western Dance Society, MAIT)
- Sports Team Captain, Prudence School

Languages: English (Fluent), Hindi (Native), French (Basic)
